HOW TO USE THIS RESOURCE

Thank you for downloading the Sweet P Solutions Halloween Communication Board + Treat Bag Sentence Strip! 🎃

This resource was created to help nonspeaking children and children who benefit from visual communication participate in trick-or-treating with greater independence, confidence, and joy.

1. Print

Print the communication board and/or sentence strip using your home printer, a local library, or a print shop.

2. Attach the Sentence Strip

Cut out the sentence strip and secure it to your child's treat bag, basket, or bucket. You can use tape, a safety pin, adhesive, or another secure method that works for your child.

3. Bring the Communication Board

Use the full-page communication board while trick-or-treating to give your child a way to communicate during the experience.

4. Make It Durable

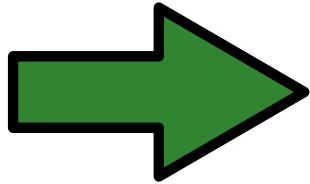

For repeated use or outdoor activities, consider laminating the communication board and sentence strip. A dry-erase marker can also be used on laminated materials when appropriate.

Most importantly, remember that communication can look different for every child. Give your child time, follow their lead, and celebrate every way they participate and communicate. We hope this resource helps make Halloween a little more accessible, inclusive, and magical for your family.
